

Video Laryngoscope

Confident | Simple | Convenient

Smart Video Laryngoscope

Smart port	USB type-C for quick data transfer and power charging
Smart screen	3.5"non-reflective touch screen, clear image viewing in panoramic field, supporting reusable&disposable blades
Smart memory	16G default / 32-256G optional
Smart rotation	up-down>120° left-right>270°
Smart save	quick press for snapshot and continuous press for video record
Smart Power	compatible with wireless chargers and save the battery automatically
Smart handle	ergonomic design for easy holding and adjustment
Smart light	high power cold light source
Smart camera	high resolution with anti-fog excellent view

SCIENTIFIC SCOPE CREATES SMART EXPERIENCE

Practice the perfect intubation at first attempt with SmartScope

≡ PRACTICE THE PERFECT INTUBATION AT FIRST ATTEMPT ≡

Smartscope improves visualization of the epiglottis, providing

- shorter time to successful intubation
- higher first-attempt intubation success rate
- higher overall intubation success rate
- reduction in applied force
- reduction in intubation-related complications

Smartscope helps prevent clinician exposure to droplet-borne pathogens

SMART SCOPE

Smartscope is designed to visualize the larynx

which can help minimize the need for tissue manipulation and improve the ability to see anterior airways to facilitate oral tracheal intubation during anesthesia and emergency medicine.

Main unit is compatible with reusable and disposable blades

Applicable Departments

Anesthesia

Pediatrics

ICU

Pre-hospital
Ambulance

Emergency
Department

Respiratory
Medicine

Smart Power

compatible with wireless chargers and save the bacteria automatically

Smart memory

16G default / 32-256G optional

SMART SCOPE makes difference in an easy intubation
