HEALTHCARE

F&P Airvo 3 Optiflow High Flow System.

A humidifier with integrated flow generator, delivering respiratory support and airway hydration with a focus on mobility and continuity across the patient journey.

Single Optiflow mode.

One mode to enable Optiflow high flow applications across adults and pediatric patients.

Flow range extended from 2 to 70 L/min to treat a wider group of patients.*
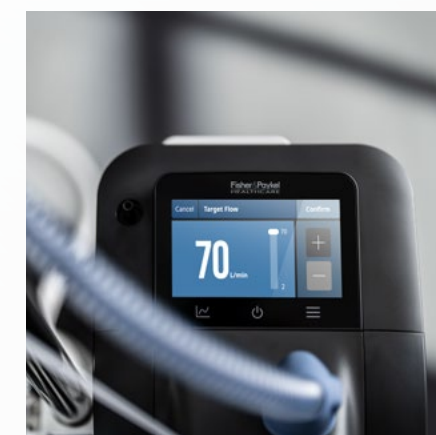

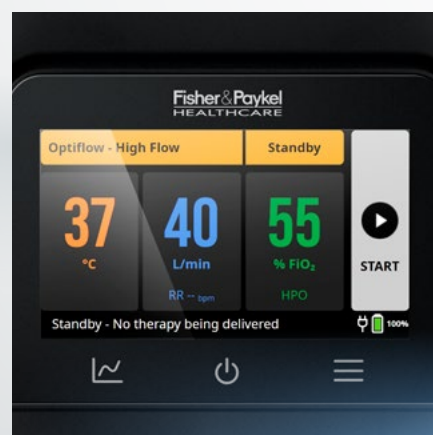

Standardised consumables.

Compatible with existing Airvo 2 patient consumables, facilitating integration into an existing Airvo 2 fleet.

Extended compatibility to smaller Optiflow Junior 2 nasal interfaces

Flexible oxygen inputs.

High-pressure oxygen input enables precise FiO_2 adjustment directly on the device, automatically adjusting oxygen input to meet target FiO_2.

Alternative low-pressure oxygen input also available.

Simple touch screen display.

Quick selection and adjustment of therapy settings.

Visualise patient trends and graphs.

Integrated battery.

Enables 40^ minutes of operating time to facilitate transport and patient mobilisation throughout the hospital environment.

* Compared to Airvo 2. ^ Typical operating time.
